Experience

SEP 2022 - Today

Ayuntamiento de Zapopan, Zapopan *Desarrollador de Sistemas*

Re-writing software tools with the web stack mainly ASP.NET, SQL Server and JavaScript. Focused on keeping features the same and developing new ones that fulfill necessities of different departments in Zapopan. Also with other team I develop features with the Laravel framework and postgresql.

SEP 2021 - Nov 2022

Dekep, Guadalajara- *Full Stack Developer*

Created software projects, with the help of Laravel and other web technologies. Full software life cycle from the first meeting till the release of the software. Customers include: Funerarias Moreh, Grupo Shoclo, Cocina Providencia..

Highlights: TDD, Laravel, AdminLTE, Laravel Breeze, Datatables, Axios, PWA, Vue

Sep 2021

Aulox - *Investigation and Development*

Hired by Aulox in Mexico to investigate Rudderstack and give them a head start on having a data driven company. Also created test chatbots for them, one for messenger with botman PHP and the other for Whatsapp with baileys.

Highlights: Documentation, How to tutorials

August 2021

Fox POS – *Full Stack Dev*

Contract hired for creating a web app with PHP for one of their customers at the time, an application for management using MySQL and PHP to manage an inventory.

Highlights: PHP MVC, AJAX, Bootstrap, MySQL

March 2021 - June 2021

Asociación Norte Veracruz, Veracruz – *Full Stack Dev*

Created a web app with Laravel to help a client administrate clubs and their members. Laravel tools such as middlewares, route model binding, eloquent, blade and others were used to complete this project.

Highlights: Laravel, TailwindCSS, Roles, Middlewares, relational db, deployment

JUN 2020 - DEC 2020

Maneto, Tonalá Jalisco– *FullStack dev*

Co-created a site for my highschool, a crud application for pdf file storage. With features such as search, download and authentication. Created with PHP and MySQL and for front we used bootstrap.

Highlights: PHP5, MVC, MySQL, File Storage, Bootstrap4

Education
