## WORK HISTORY

**Software Engineer**

**Globallogic**                                                                 07/2023 - Current

- We migrated tenants running on PHP 5 to PHP 8 by utilizing tools such as Bash, regex, and PHP. The migration involved consolidating client code into a single, unified repository for easier management.
- Delivering new features as a full stack dev.
- Conducted regular 1-on-1 meetings with team members to provide guidance, address concerns, and support professional development.
- Assisted in resolving P0 and P1 issues, ensuring prompt and effective solutions to critical problems.
- Created documentation for new features to ensure clear understanding and ease of use for the team and stakeholders.
- Used: PHP5, PHP7 & PHP8, Xdebug, Bash, Regex, SQL, GIT & Github, Jira, Slack, Docker, Apache, Ubuntu & CentOS Server, JQuery, Bootstrap css

### Desarrollador de Sistemas

**Ayuntamiento de Zapopan**                                    09/2022 - 07/2023

- Analyze legacy code with product owners to rebuild using ASP.NET MVC 6 and SQL Server
- Support other teams in delivering features across projects.
- Used: ASP.NET MVC 6, SQL Server, JQuery, Bootstrap css, DataTables, Python, JavaScript

### Full Stack Developer

**Freelance Contract**                                        03/2023 - 07/2023

- Develop a subscription based E-commerce, built a single page application using Laravel for backend and Vue.js for front end and using Inertia.js for integration.
- Implemented Laravel Middleware to manage user subscriptions and enforce access control.
- Integrated Stripe Cashier for subscription billing and payment processing.
- Designed A referral & rewards system, Developed a relational database to track referrals and awarded points upon purchase.
- Configured an AWS EC2 instance to host the application, setting up Nginx, PHP and Node.js.
- Used: Laravel, Vue.js, Inertia.js, PHP, Node.js, Mysql, Stripe Cashier, AWS EC2, Nginx, Git

### Full Stack Developer

**Dekep**                                                     09/2021 - 11/2022

- Designed and implemented the database schema.
- Developed core application models and business logic.
- Created reusable and customizable components.
- Set up and configured the production servers.
- Managed deployment and ongoing maintenance.
- Used: RestAPI, Laravel, Vue.js, AdminLTE, VueX, MySQL, AWS, Laravel Forge, Laravel Breeze, Bootstrap, Tailwind CSS, Git

### Freelance Full Stack Developer

**Rya**                                                       04/2022 - 06/2022

- Designed and developed a restful api.
